

“Aru patio LINE 68 SOFTLINE IN” are made from of three-layered laminated Pine, Oak or Meranti .The active or opening side of this tilting / sliding door fits neatly into its supporting frame when closed which allows the use of a thinner than usual frame for a modern look. The door can be opened either by sliding or by tilting. The standard solution allows the door to be locked only from the inside, but as a special order it is possible to lock the door from both sides.

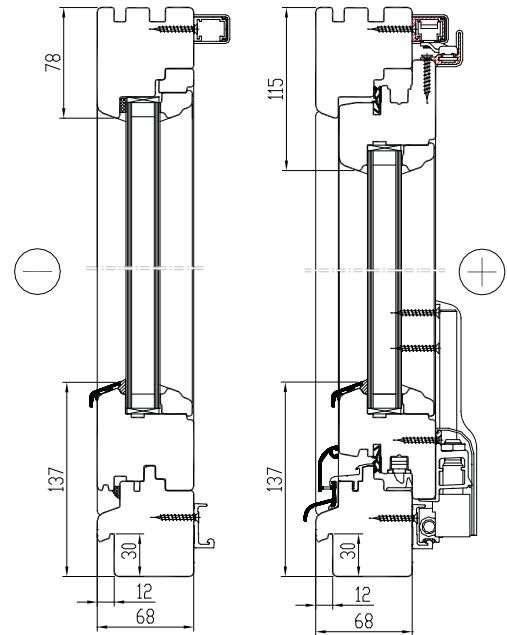

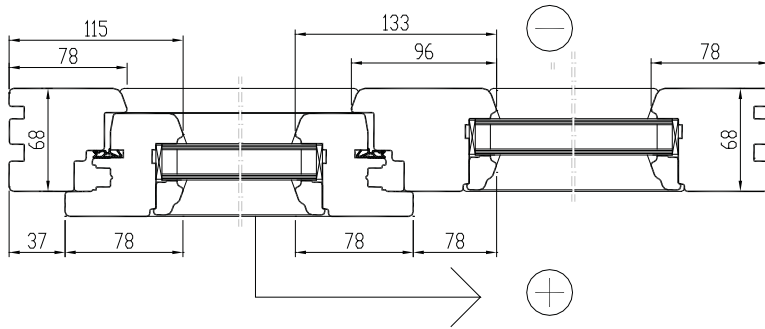

This door is an ideal companion to tilt and turn windows as the external profiles are exact match.
